Meso Gym Fact Sheet

Hypertrophy Training, Planned For You

What It Is

Meso Gym is a hypertrophy training app. It plans your mesocycles, RIR targets, weekly volume per muscle and deloads, then adjusts next week to how you actually recovered. You open the app and train; the planning is done for you.

Key Facts

App name	Meso Gym
Developer	Meso Gym, an independent developer based in the United Kingdom
Platforms	Android: available now on Google Play.
Website	mesogym.com (press kit: mesogym.com/press.html)
Category	Health & Fitness
Exercise library	348 exercises, each with a demo video
Units	kg or lb
Ads	None
Free trial	7-day Pro trial
Press contact	The contact form at mesogym.com/contact.html (choose Press/Partnership)

Prices (GBP)

Plan	App stores	Website (mesogym.com)
Pro (one person)	£9.99 a month or £59.99 a year	£8.99 a month or £53.99 a year
Family (you plus 4 people)	£24.99 a month or £149.99 a year	£21.99 a month or £134.99 a year
Trainer plans	Website only	Starter £24.99 a month (4 clients), Pro Trainer £47.99 (9 clients), Studio £89.99 (19 clients), Gym £169.99 (39 clients). Yearly prices also available.

Prices in other currencies are shown on mesogym.com/pricing.html.

Key Features

- Mesocycles of 4 to 6 working weeks plus a deload, with each muscle set to Emphasise, Grow or Maintain.
- Effort that builds week by week, suggested weights and a built-in rest timer.
- Feedback on pump, soreness and workload after each session sets next week's sets and weights.

- Joint pain flag, exercise swap, and skip or move a session when life gets in the way.
- 348 exercises, each with a demo video, sorted best first for each muscle.
- Progress charts for estimated 1RM and weekly sets, a body map and a summary of every block.
- Family plan for you plus four people.
- No ads.
- Trainer Dashboard on the website for coaches, with client consent.

Glossary

Mesocycle	A training block of several weeks that builds gradually, then ends with a deload.
RIR	Reps In Reserve: how many more clean reps you could have done when you stopped the set.
MEV	Minimum Effective Volume: the fewest weekly sets for a muscle that still drive growth.
MAV	Maximum Adaptive Volume: the weekly set range where most people grow best.
MRV	Maximum Recoverable Volume: the most weekly sets you can recover from.
Deload	A lighter week with fewer sets and easier effort, so fatigue drops before the next block.

Company

Meso Gym is built and run by an independent developer in the United Kingdom.

Meso Gym is an independent app and is not affiliated with, endorsed by or sponsored by Renaissance Periodization (RP Strength). The default volume landmarks are based on RP's publicly available Hypertrophy Hub figures.
